Surface Solutions, Designed by Nature

JULY 2025 COMPANY PROFILE

Company Overview

Established 29 years ago, GLAZE has proven itself as the strongest brand in the UAE stone industry, both in natural and engineered markets. Headquartered in Sharjah, GLAZE has garnered a loyal and growing clientele across the Middle East. Known for its premium quality selection, GLAZE has a robust and diverse portfolio of over 500 stones.

GLAZE is able to handpick the finest surface solutions due to its exclusive relationships with top quarries from around the world, as well as exclusive distributorship rights from leading brands of engineered stones such as NEOLiTH by The SIZE, XTONE by Porcelanosa Group, Caesarstone, Coante, Nobilita, and in-house developed brands KOZO Quartz & Porcelain. GLAZE has enabled architects, contractors, and homeowners alike to bring projects of any scale to life with unwavering commitment and unmatched quality and service.

GLAZE sets itself apart from competitors with over 1 million sq. meters of stone under one roof, offering our clientele a wide selection of surface solutions at competitive prices. Prior to GLAZE's trailblazing efforts in the UAE, there was no other marble company that treated the material for what it truly is, a luxury investment.

Honoring the beauty of these natural creations, GLAZE began showcasing our meticulously chosen materials in our state-of-the-art stone galleries and world class displays 15 years ahead of anyone else in the Middle East. A visit to GLAZE's stone galleries and showrooms offers a unique experience for architects, designers, and homeowners unmatched globally. For more info, visit our website.

STONE GALLERY

SHARJAH

Encompassing an expansive 300,000+ sq ft, our flagship boasts a state-of-the-art Stone Gallery, an ultra-modern office, showroom building and fabrication unit equipped with cutting edge, Italian GMM CNC machines, ensuring precision in fabrication. Meticulously fashioned by the renowned Milan-based design firm, AD-Myra, our headquarters offer an unparalleled experience for architects, designers, and homeowners.

STONE GALLERY

ABU DHABI

Spanning over 110,000 sq ft, our second Stone Gallery in Abu Dhabi echoes the concept of our flagship facility. Featuring a thoughtfully curated selection of materials and a refined gallery layout, it offers an immersive experience—unlike any other in the Emirates.

SHOWROOM

DUBAI

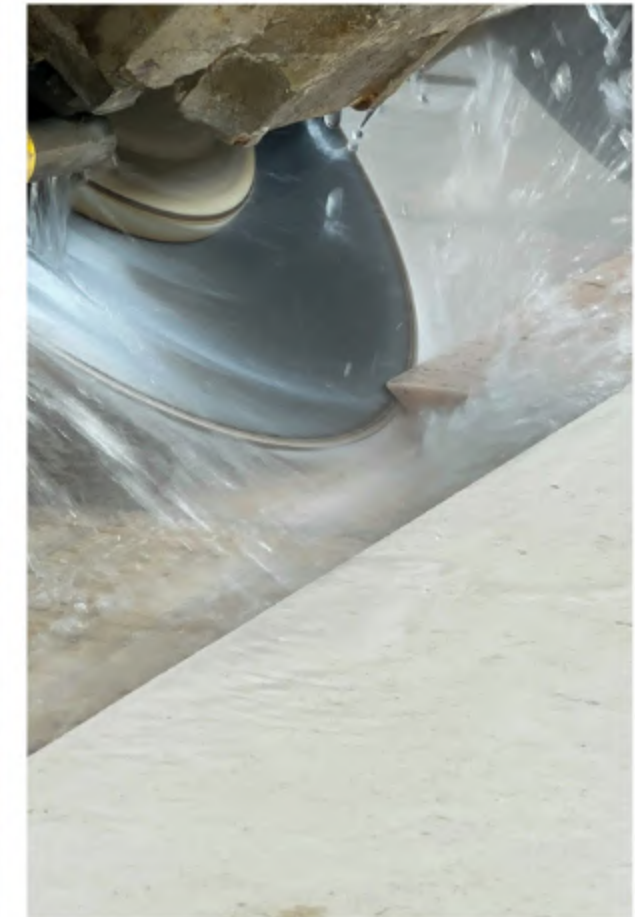

Focusing on Engineered stone brands such as Nobilita, Neolith, Xtone, Caesarstone, Coante, KOZO Porcelain & Quartz, this outlet strategically situates itself on Sheikh Zayed Road in the heart of the luxury product market. The showroom also features a boutique corner for the display of high-end marble and precious stones.

FABRICATION UNIT

SHARJAH

At our Sharjah facility, GLAZE boasts a state-of-the-art fabrication unit with multiple CNC machines, all powered by GMM technology from Italy. Our advanced machinery and skilled personnel transform raw stone into stunning masterpieces with unmatched precision and technical prowess.

NATURAL STONE

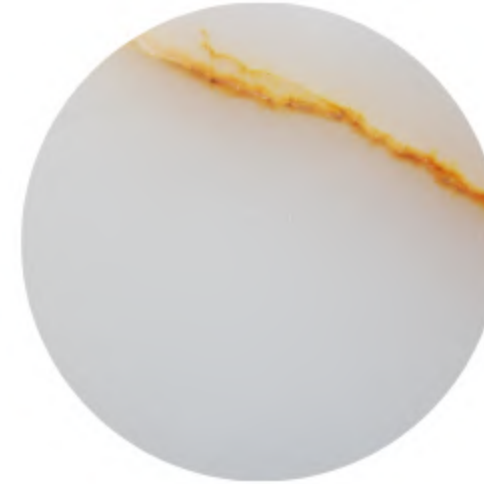

DESIGNED BY NATURE

Recognizing the timeless appeal and architectural significance of natural stone, GLAZE has curated one of the most extensive selections of marble, quartzite, onyx, travertine, granite, and limestone in the MENA region.

Sourced directly from the world's most renowned quarries, GLAZE's natural stone portfolio includes over 500 meticulously selected varieties. From the rich veining of Italian marble and the crystalline brilliance of Brazilian quartzite, to the translucent beauty of onyx and the rustic charm of travertine, each stone tells a story of geological artistry. Granite and limestone, prized for their strength and versatility, round out the collection—ensuring that every aesthetic and functional requirement can be met with enduring natural elegance.

LIMESTONE

MARBLE

From the Parthenon in Greece to the Sheikh Zayed Mosque in Abu Dhabi, marble has always been a luxurious cultural symbol of architectural refinement. Its extravagant beauty, which lasts generations, has been a favorite medium of sculptors and architects because of its ability to transform ordinary spaces into monuments for the ages.

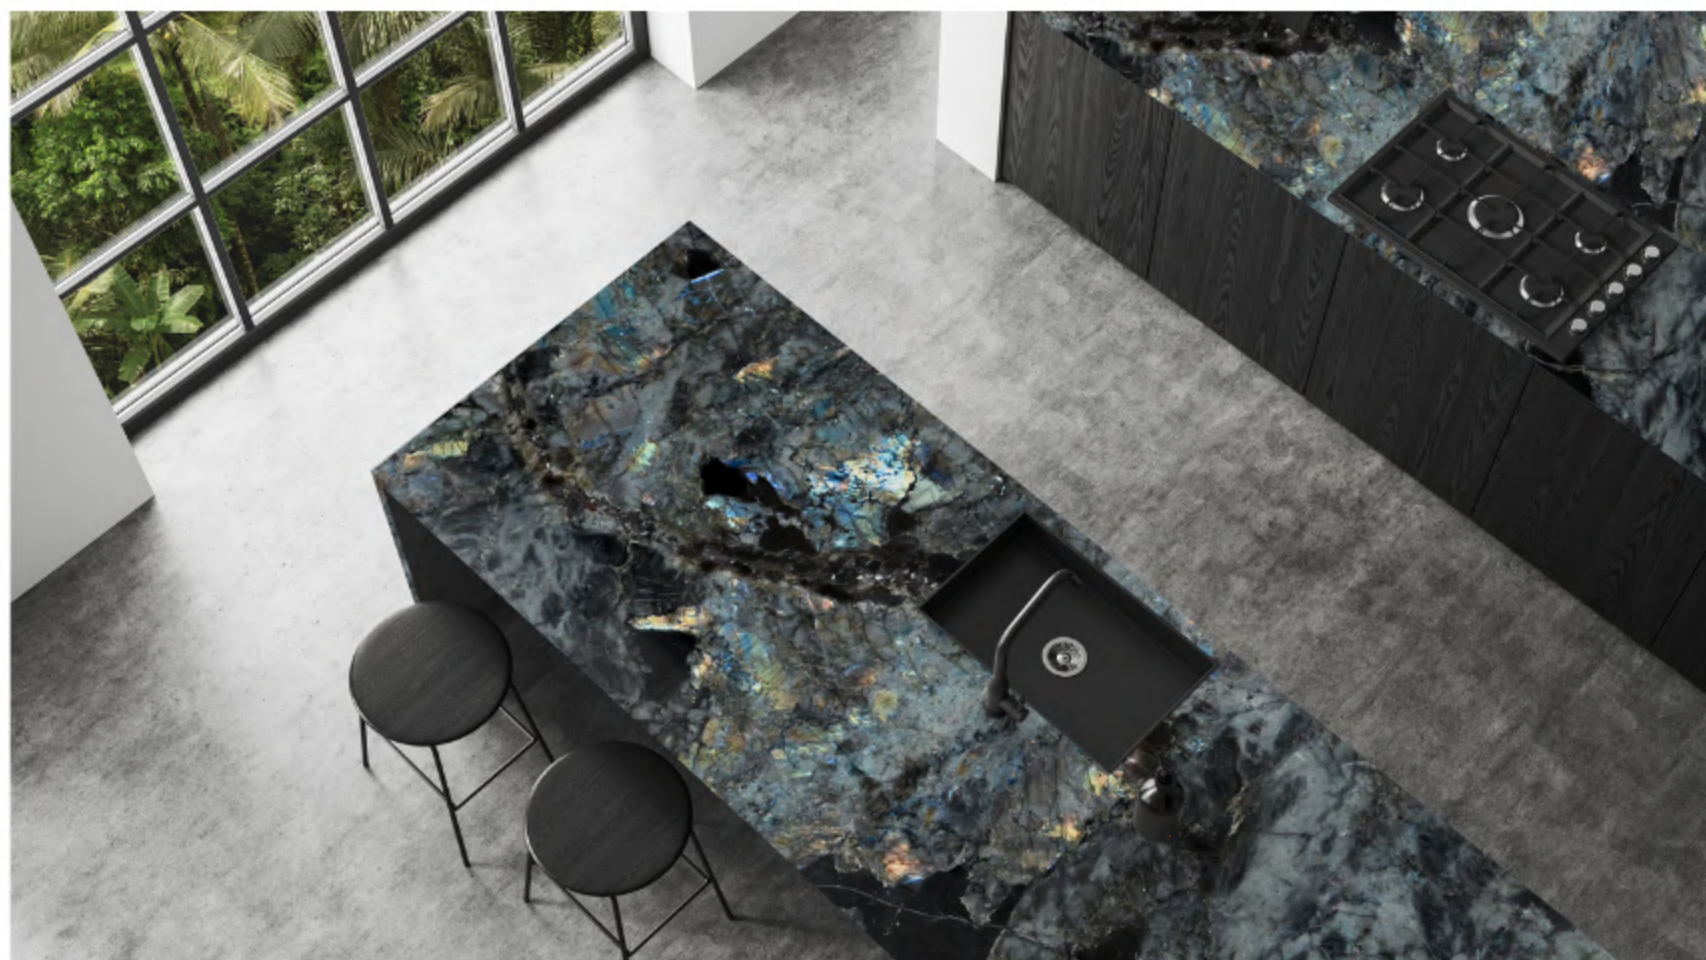

ONYX

Onyx is an exotic natural stone that exudes luxury and glamour due to its unique ability to transmit light, allowing for breathtaking, effusive arrangements. The dazzling visual display created by backlit onyx is a particularly powerful ornamental tool for creating an unforgettable mood and ambience in both classic and modern architecture.

QUARTZITE

Quartzite is a metamorphic rock, like marble, rather than an igneous rock like granite. Extremely hard and compact, with exotic veining and coloring, quartzite is the most versatile and durable of all natural stones. Resistant to chemical weathering, non-porous, scratch-resistant, and hard as diamonds, quartzite is easy to maintain and admire in every space it graces.

GRANITE

Granite is a unique and special rock, signature of planet Earth. An extremely strong stone, granite's strength can be attributed to its density, formed during the slow cooling of magma after volcanic eruption. Remarkably resistant to weathering, this stone has been the premier choice for kitchen countertops and flooring in high-traffic areas, both private and public, for decades.

TRAVERTINE

Travertine is a form of massive calcium carbonate, a natural stone resulting from the sedimentation of rivers and springs. Though it is porous, it is a dense and closely compacted form of limestone, making it a perfect material for residential and commercial use due to its subtle splendor and durability, as seen in the iconic Coliseum of Rome.

LIMESTONE

Limestone has a rich history of being central to architectural expression around the world, as early as the Great Pyramids of Egypt.

Its longevity, and ability to withstand exposure to the most adverse weather conditions, make it a dependable, time-tested architectural resource.

ENGINEERED STONE

OFFICIAL DISTRIBUTOR

Recognizing the growing demand for engineered stones in the Middle Eastern market, GLAZE has secured exclusive distributorships with some of the world's leading brands.

In sintered stone technology, NEOLITH and XTONE by Porcelanosa Group stand at the forefront of innovation. In the engineered quartz category—particularly dominant in the countertop segment—GLAZE has partnered with industry leaders, including the pioneering quartz brand Caesarstone and Coante, developed using renowned Italian BretonStone technology. GLAZE has also launched its own bespoke brands, KOZO Quartz and KOZO Porcelain, designed to serve a wide range of market needs. KOZO's striking designs are inspired by classic Italian marble. Additionally, GLAZE exclusively offers Nobilita, a premium porcelain brand made in Italy, known for some of the most elegant and distinctive designs available today.

NEOLITH[®]

SINTERED STONE

Neolith is the most technologically advanced surface solution today. It is the future of porcelain slabs - a surface that's resistant to scratches and fire, and made entirely from natural, recyclable minerals, setting revolutionary new standards in architectural surfaces.

XTONE

by PORCELANOSA

XTone combines avant-garde technology with the elegance of natural elements in order to offer a versatile range of large-format slabs. Founded in 1973 by the Porcelanosa family, the company has leveraged their specialization in design to redefine the possibilities of interior and exterior compositions.

Founded in 1987, Caesarstone is a pioneer of the quartz surfaces market, and undoubtedly remains the top brand in the world. They constantly challenge themselves, setting new standards in innovation and design through extensive investments in R&D.

Coante engineers intricate marble veining through ground breaking, BRETONSTONE® technology. Their trademarked plants produce the most durable quartz surfaces, guaranteed to give life to your kitchen counter top for 20 years or longer.

Powered by cutting-edge technology and enriched with the finest Cristobalite grade of Quartz mineral, KOZO Quartz surfaces showcase authentic patterns and streaks, imbuing engineered Quartz with the vitality of a natural stone.

KOZO large format porcelain slabs are revolutionary architectural surfaces produced using ultra-modern Italian Technology, SACMI. Under extremely high pressure and high temperature, the desired strength, hardness, and durability is painstakingly achieved. Inspired by classic Italian marbles with intricate veining, KOZO Porcelain offers a breathtaking collection.

IL GRES IMPERIALE d'ITALIA, The Imperial Stone of Italy, embodies Baroque elegance and noble sophistication. Crafted in Modena — home to Ferrari, Acetaia Giusti, and Brioni — the NOBILITA porcelain collection merges timeless Italian craftsmanship with cutting-edge technology, celebrating the culture and refinement of Italy's noble class.

MAER*Charme*

semipreciousstones handmade

Maercharm is a globally renowned brand and pioneer in transforming semi-precious stones into innovative slab formats. Based in Romania, their handmade, exquisitely crafted stones, admired for their elegance and versatility, set the standard for luxury interior design applications worldwide.

CUSTOMER SERVICE

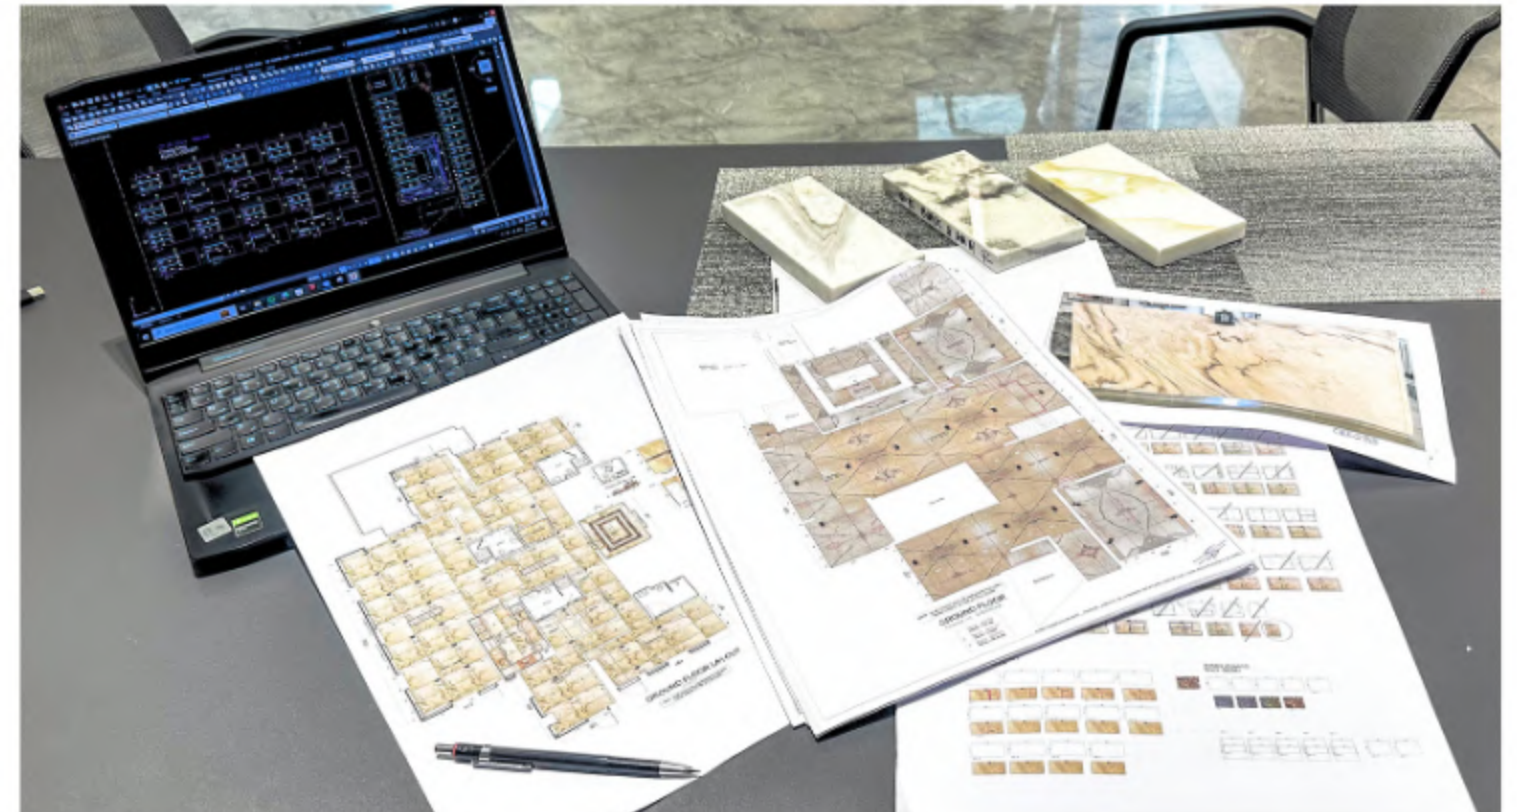

Advanced Software

GLAZE utilizes cutting-edge software technology from USA to manage stock and distribution seamlessly. This advanced system provides the GLAZE sales team, in both desktop and mobile version, real-time updates on stock levels, transit status, availability, pictures and packing lists of entire inventory. By empowering the team with comprehensive and real-time information, GLAZE ensures swift and efficient service for its valued customers.

Drawings & Detailing

Our expert team of architects and technical staff offers comprehensive project support, including floor layout drawings, joints and fixing details, and final cutting lists. GLAZE ensures seamless end-to-end project execution.

CUSTOMER SUPPORT

Support Tools

GLAZE has created a comprehensive range of display tools including catalogues, tower stands, and sample trays to help architects, designers, contractors, and end users easily review and select the ideal surface solutions.
