*Surface Solutions, Designed by Nature*

# Company Overview

Established 29 years ago, GLAZE has proven itself as the strongest brand in the stone industry, both natural and engineered, in the UAE. Headquartered in Sharjah, the company has garnered a loyal and growing clientele across the entire Middle East. Known for its premium quality selection, GLAZE is able to handpick the finest surface solutions due to its exclusive relationships with top quarries from around the world. GLAZE has developed a robust and diverse portfolio of material, sourcing over 500 natural stones, and acquiring exclusive distributorship rights from leading brands of engineered stone, such as NEOLiTH by The SIZE, XTONE by Porcelanosa Group, Caesarstone, Coante, and in-house developed brands KOZO Quartz and Porcelain. GLAZE has enabled architects, contractors and homeowners alike to bring projects of any scale, to life, with unwavering commitment.

GLAZE sets itself apart from competitors with over 1 million square meters of stone under one roof, serving its clientele with a wide selection of surface solutions at competitive prices. Prior to GLAZE's trailblazing efforts in the UAE, there existed no other marble company that treated the surface for what it was - a statement luxury piece. Honoring the beauty of these natural creations, GLAZE began to showcase these meticulously chosen materials within state of the art stone galleries and world class display at least 15 years ahead of anyone else in the Middle East. A visit to GLAZE stone galleries and showrooms offers a unique experience for architects, designers, and homeowners, unmatched globally. For more info, visit our website.

## STONE GALLERY

### Sharjah

Encompassing an expansive 300,000+ square feet, this site boasts a state-of-the-art Stone Gallery, an ultra-modern office cum showroom building and a fabrication unit equipped with cutting edge, Italian Gmm CNC machines, ensuring precision in fabrication. Meticulously fashioned by the renowned Milan-based design firm, AD-Myra by Elisa & Luca, our headquarters offer an unparalleled experience for architects, designers, and homeowners.

## STONE GALLERY

### Abu Dhabi

Echoing the concept of the Sharjah facility, this second Stone Gallery spans over 110,000 square feet, embodying uniqueness within the Emirates.

## SHOWROOM

Dubai, Sheik Zayed Road

Focusing on Engineered stone brands such as Neolith, Xtone, Caesarstone, Coante, KOZO Porcelain, and KOZO Quartz, this outlet strategically situates itself on Sheikh Zayed Road in the heart of the luxury product market. The showroom also features a boutique corner for the display of high-end marble and precious stones.

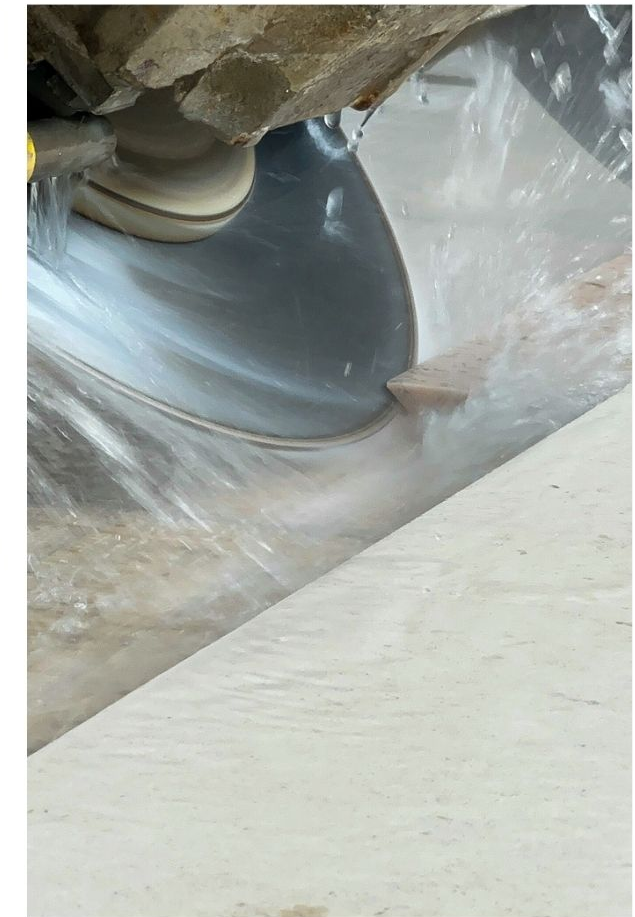

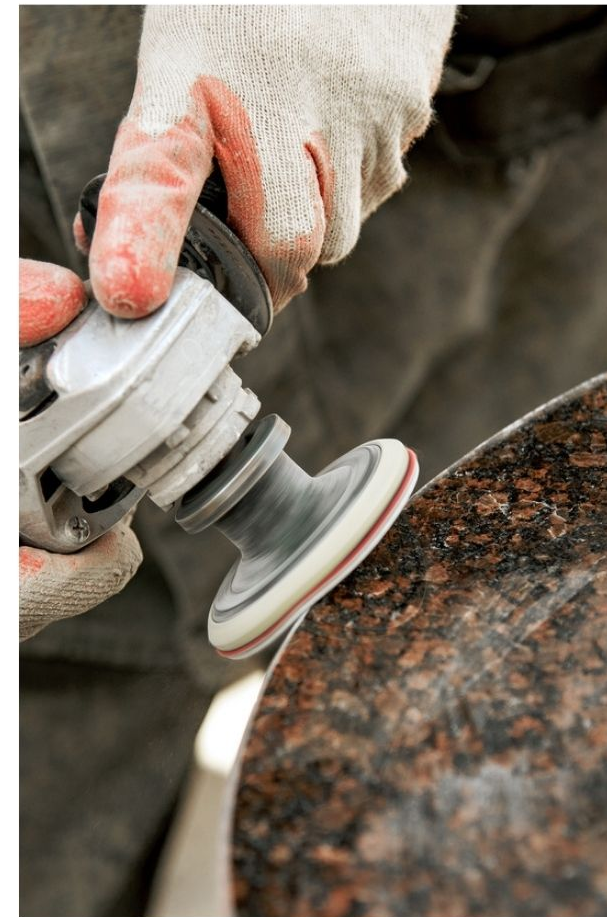

## FABRICATION UNIT

### Sharjah

At our Sharjah facility, GLAZE boasts a state-of-the-art fabrication unit with multiple CNC machines, all powered by GMM technology from **Italy**. Our advanced machinery and skilled personnel transform raw stone into stunning masterpieces with unmatched preciseness.

# Marble

From the Parthenon in Greece, to the Sheikh Zayed Mosque in Abu Dhabi, Marble has always been a luxurious cultural symbol of architectural refinement. Its extravagant beauty, which lasts for generations, has always been a favourite medium of sculptors, architects and designers, transforming an ordinary space into a monument for the ages.

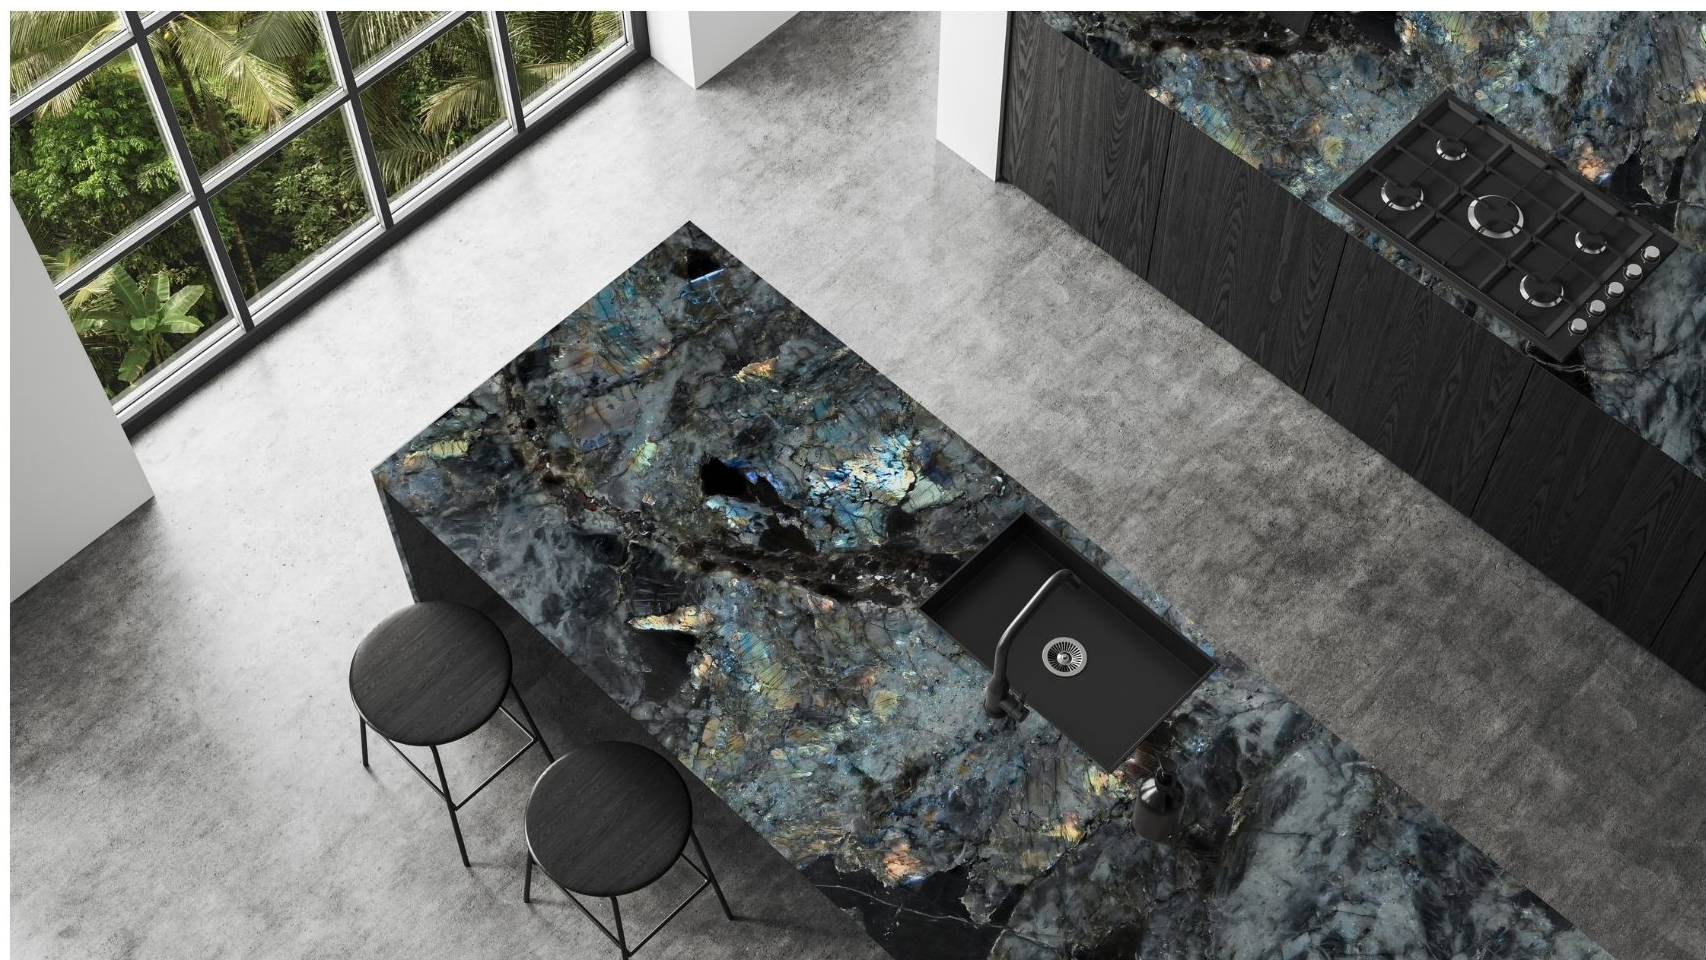

# Onyx

Onyx is an exotic natural stone that exudes luxury and glamour, due to its unique ability to transmit light, allowing for breathtaking effusive arrangements. The dazzling visual display created by back lit onyx is a particularly powerful ornamenting tool for creating an unforgettable mood and ambience of classic as well as modern architecture.

# Quartzite

Often confused with Granite, Quartzite, is a metamorphic rock same as Marble, rather than igneous rock like Granite. Extremely hard and compact, exotically veined and colored, Quartzite is the most versatile and durable stone amongst all of the natural stones. Resistant to chemical weathering, non porous, scratch resistant, and hard as diamonds, Quartzite is easy to maintain and admire in every space it conquers.

# Granite

Granite is a unique and special rock - the signature of planet Earth. An extremely strong stone, the strength of Granite can be attributed to its density, which is acquired during the slow cooling of magma, after volcanic eruption. Remarkably resistant to weathering, this stone has been the premier choice for kitchen tops, and flooring in high traffic areas in both private and public spaces for decades.

# Travertine

Travertine is a form of massive calcium carbonate, a natural stone resulting from the sedimentation of rivers and springs. Though it is porous, it is in fact a dense and closely compacted form of limestone, perfect material for residential and commercial use, due its to subtle splendor and durability as seen in the iconic Coliseum of Rome.

# Limestone

Limestone has a rich history of being central to architectural expression around the world, as early as the Great Pyramids of Egypt. Its longevity, and ability to withstand exposure to even the most adverse weather conditions, make it a dependable, time-tested architectural resource.

# ENGINEERED STONE

## OFFICIAL DISTRIBUTOR

Recognizing the burgeoning demand for Engineered stones in the Middle Eastern markets, GLAZE has secured exclusive distributorships for the world's leading brands in Sintered Stone Technology, NEOLiTH and XTONE by Porcelanosa Group. These Sintered stones represent the pinnacle of innovation in the market.

In the realm of Engineered Quartz, dominating the countertop segment, GLAZE has forged partnerships with industry leaders, pioneering Quartz brand Caesarstone and acclaimed Italian BretonStone Technology developed Coante. Furthermore, GLAZE has introduced its own bespoke brands in Quartz and Porcelain, KOZO Quartz and KOZO Porcelain, catering to diverse market segments. KOZO's captivating designs draw inspiration from classical Italian marble.

# NEOLITH<sup>®</sup>

SINTERED STONE

Neolith is the most technologically advanced surface solution today. It is the future of porcelain slabs - a surface that's resistant to scratches and fire, and made entirely from natural, recyclable minerals, setting revolutionary new standards in architectural surfaces.

# XTONE

by PORCELANOSA

XTone combines avant-garde technology with the elegance of natural elements in order to offer a versatile range of large-format slabs. Founded in 1973 by the Porcelanosa family, the company has leveraged their specialization in design to redefine the possibilities of interior and exterior compositions.

Founded in 1987, Caesarstone is a pioneer of the quartz surfaces market, and undoubtedly remains the top brand in the world. They constantly challenge themselves, setting new standards in innovation and design through extensive investments in R&D.

Coante engineers intricate marble veining through ground breaking, BRETONSTONE® technology. Their trademarked plants produce the most durable quartz surfaces, guaranteed to give life to your kitchen counter top for 20 years or longer.

Powered by cutting-edge technology and enriched with the finest Cristobalite grade of Quartz mineral, KOZO Quartz surfaces showcase authentic patterns and streaks, imbuing engineered Quartz with the vitality of a natural stone.

KOZO large format porcelain slabs are revolutionary architectural surfaces produced using ultra-modern Italian Technology, SACMI. Under extremely high pressure and high temperature, the desired strength, hardness, and durability is painstakingly achieved. Inspired by classic Italian marbles with intricate veining, KOZO Porcelain offers a breathtaking collection.

Maercharm is a globally renowned brand and pioneer in transforming semi-precious stones into innovative slab formats. Based in Romania, their handmade, exquisitely crafted stones, admired for their elegance and versatility, set the standard for luxury interior design applications worldwide.

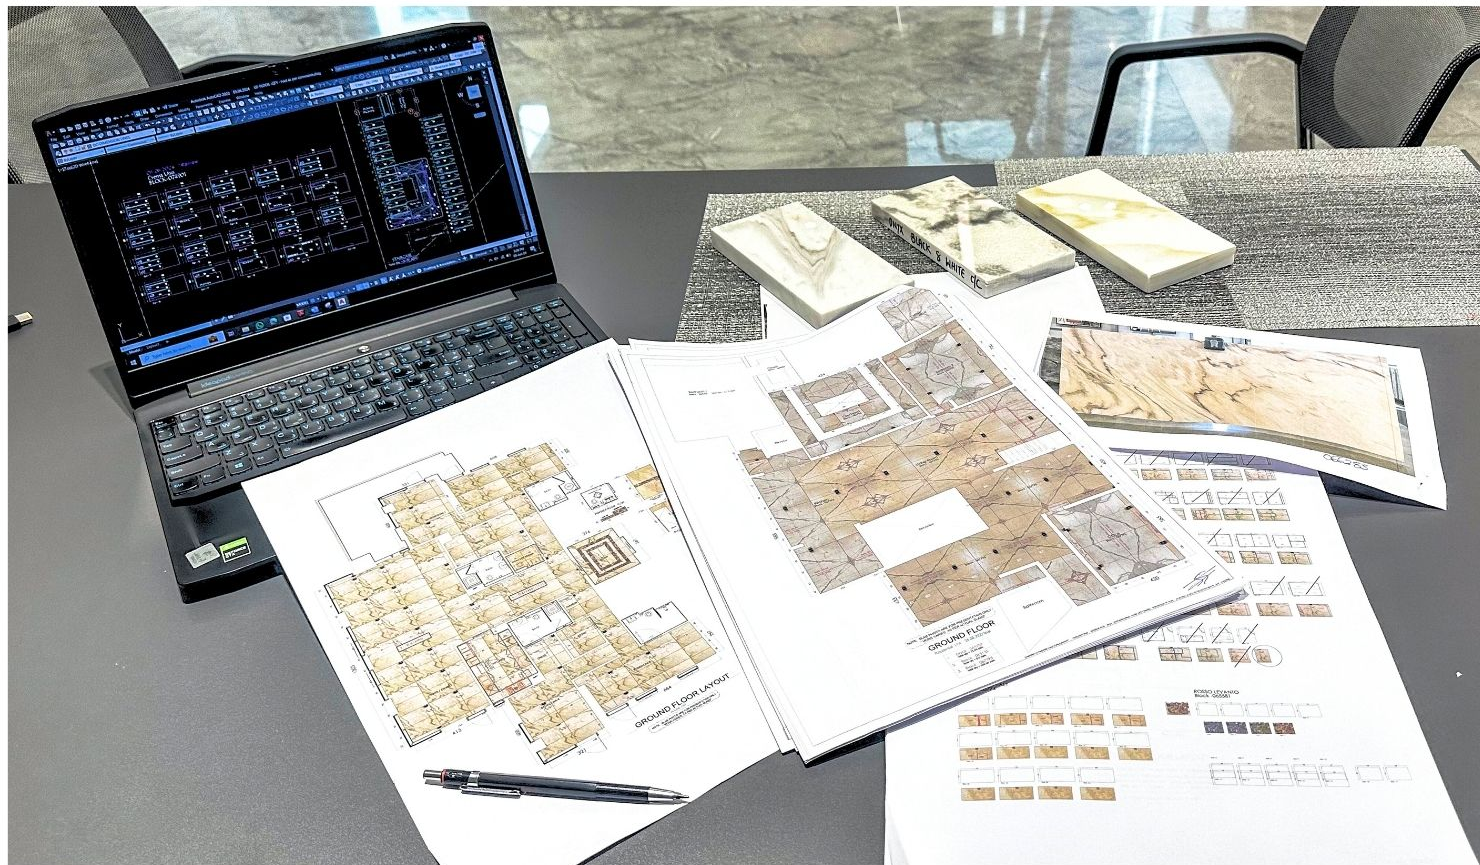

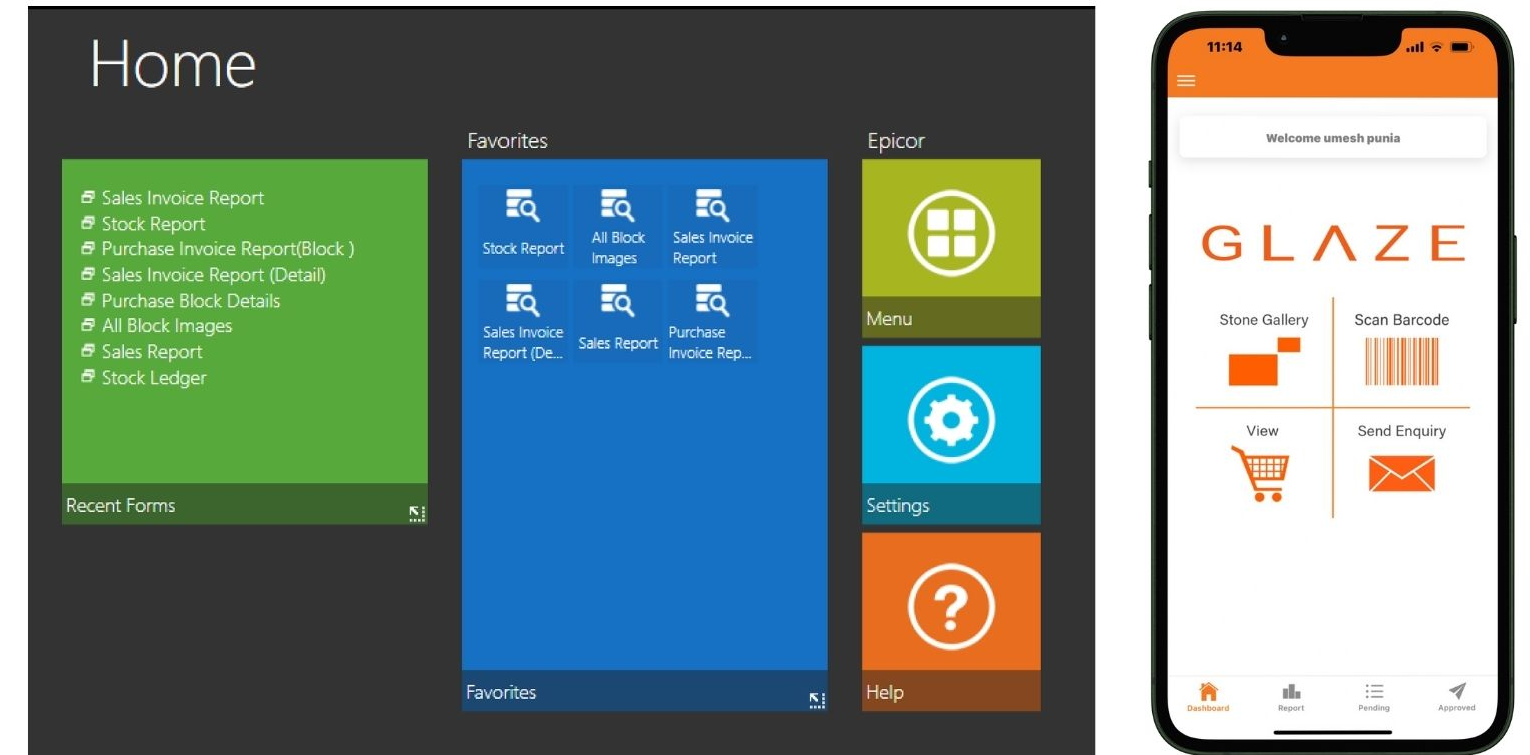

# Customer Services

## Advanced Software for Efficiency

GLAZE utilizes cutting-edge software technology from USA to manage stock and distribution seamlessly. This advanced system provides the GLAZE sales team, in both desktop and mobile version, real-time updates on stock levels, transit status, availability, pictures and packing lists of entire inventory. By empowering the team with comprehensive and real-time information, GLAZE ensures swift and efficient service for its valued customers.

## Drawings & Detailing

Our expert team of architects and technical staff offers comprehensive project support, including floor layout drawings, joints and fixing details, and final cutting lists. GLAZE ensures seamless end-to-end project execution.

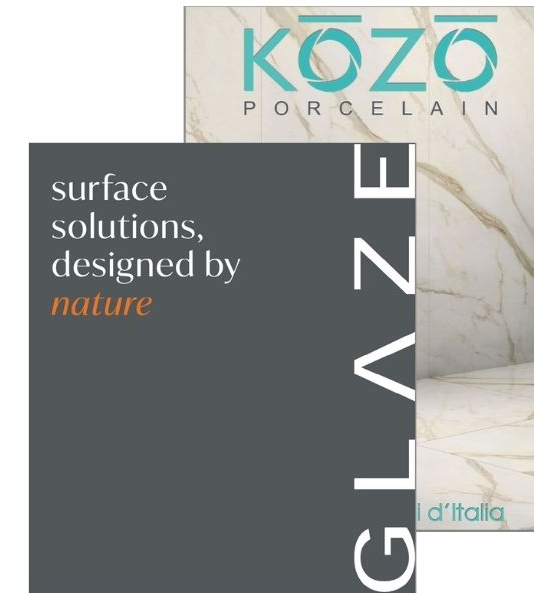

# Customer Support

## Support Tools

GLAZE has developed an extensive display system featuring catalogues, tower stands, and sample trays, making it easy for architects, designers, and contractors alike to **select and specify** their ideal surface solution within the comfort of their office.
